NovaTech Solutions - Proof of Collaboration

INSY7315 Part 3 Submission

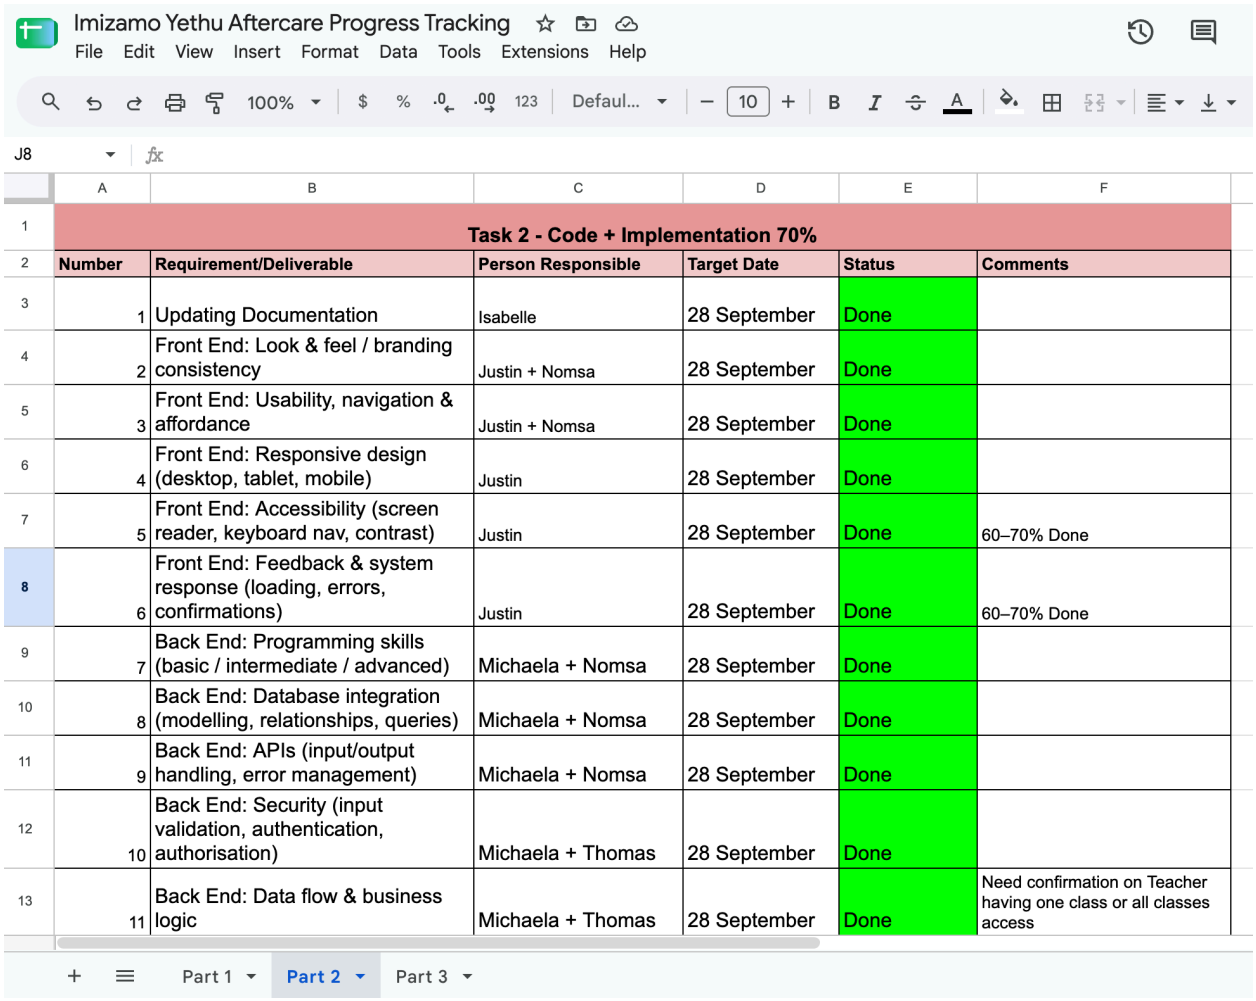

This document reflects the proof of collaboration between NovaTech Solutions team members and is an alternative to GitHub Insights, which could not be enabled.

A WhatsApp group, Discord server, shared Google Drive, and GitHub Projects were used to assist with progress tracking and communication.

Below are screenshots of all platforms used throughout the project by the team members, especially in regards to group communication.

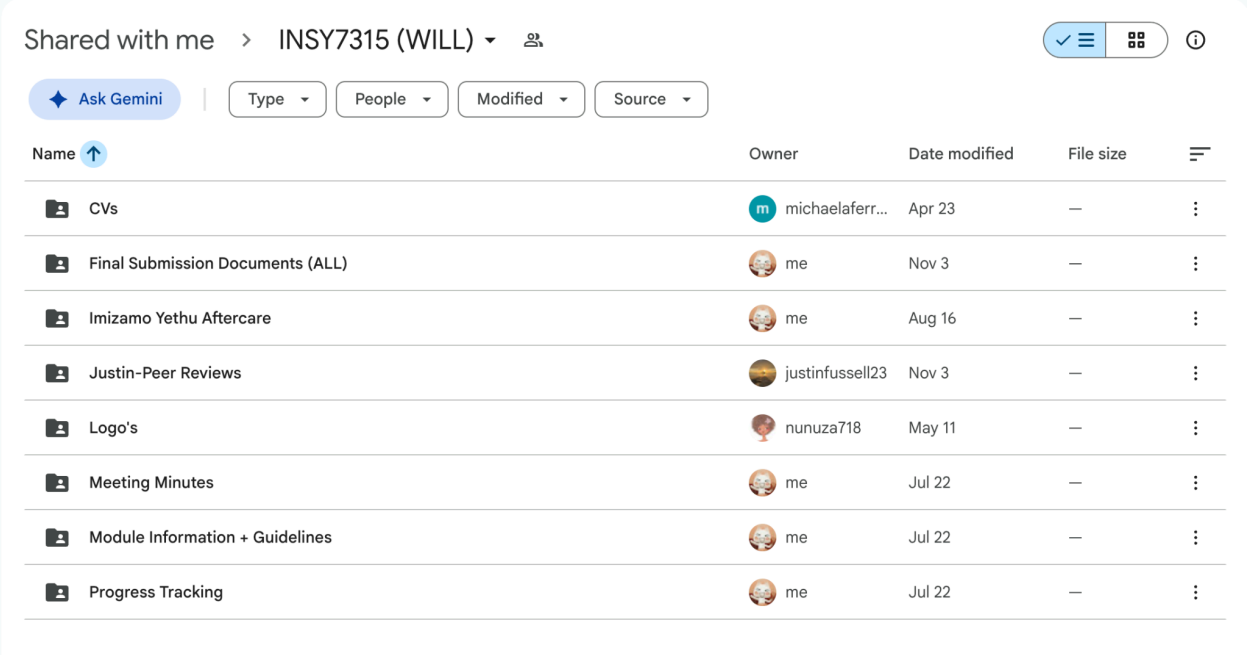

Above is a screenshot of the current GitHub Project Kanban board. Issues were assigned to certain members, and members worked on separate branches. All work was tested and approved before merging. On the left, you can see the amount of tasks each member was assigned, minus a few that were recorded on WhatsApp only.

	A	B	C	D	E	F
1	Task 2 - Code + Implementation 70%					
2	**Number**	**Requirement/Deliverable**	**Person Responsible**	**Target Date**	**Status**	**Comments**
3	1	Updating Documentation	Isabelle	28 September	Done	
4	2	Front End: Look & feel / branding consistency	Justin + Nomsa	28 September	Done	
5	3	Front End: Usability, navigation & affordance	Justin + Nomsa	28 September	Done	
6	4	Front End: Responsive design (desktop, tablet, mobile)	Justin	28 September	Done	
7	5	Front End: Accessibility (screen reader, keyboard nav, contrast)	Justin	28 September	Done	60–70% Done
8	6	Front End: Feedback & system response (loading, errors, confirmations)	Justin	28 September	Done	60–70% Done
9	7	Back End: Programming skills (basic / intermediate / advanced)	Michaela + Nomsa	28 September	Done	
10	8	Back End: Database integration (modelling, relationships, queries)	Michaela + Nomsa	28 September	Done	
11	9	Back End: APIs (input/output handling, error management)	Michaela + Nomsa	28 September	Done	
12	10	Back End: Security (input validation, authentication, authorisation)	Michaela + Thomas	28 September	Done	
13	11	Back End: Data flow & business logic	Michaela + Thomas	28 September	Done	Need confirmation on Teacher having one class or all classes access

Above is a screenshot of the progress tracking spreadsheet used by the team members for task allocation as well as progress tracking. It was used side by side with the GitHub Projects.

Above is a screenshot of the shared Google Drive between the team members.

Furthermore, the role of each member is as follows:

- Justin Fussell - Frontend
- Michaela Ferraris - Backend, Project Manager 1
- Nomsa Mkoka - Backend, Database
- Isabelle Devlin - Application Hosting, Documentation, Project Manager 2
- Thomas Pheiffer - Application Security

More information on team collaboration and task allocation will be spoken about in the EXPO, as during stressful deadlines, many members assisted where they could.

Various meetings were held throughout the project, from client meetings to group discussions. These were either held via Google Meet, Discord, or on campus in the discussion room.
